REVITALIZE PROTOCOL

1. Clean, sterilize and apply anesthetic topical cream to the area to be treated.

2. After 30-60 minutes check if the area for numbness. Remove topical cream with gauze and warm water. Exfoliate the area with a double cleanse, sterilize area and blot dry. Protect patient using appropriate means of covering like gauze, micro-pore tape and head-band.

3. Select chosen mesotherapy product and drawdown 1ml into sterile container - two products can be mixed together to form a cocktail ½ ml each.

4. Apply the product to area being treated with a cotton bud or gauze.

5. Choose depth on Micro-needling Pen to maximum depth for the area being treated: (1mm face and 2-2.5mm body) and begin to stamp the mesotherapy product into the skin covering all areas.

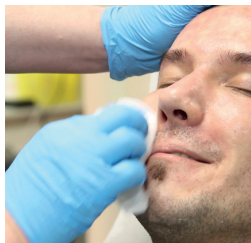

6. Apply second layer of mesotherapy product.

7. Reduce micro-needle pen depth to half previous chosen. Create rows vertical and horizontal to cover all the areas.

8. Apply 3rd layer of product and repeat using "s" sweeping motions to cover all areas.

9. Apply the remaining mesotherapy product liberally all over with cotton bud or gauze.

10. A mask can be used to relax the skin for 5 minutes.

11. Blot the area dry with a tissue.

12. Apply moisturizer and/or SPF cream.
